

JOIFF accredited Confined Spaces Training.

Minimum pre- attendance requirements for JOIFF accredited Training in Confined Space Entry / Access Training where respiratory protective equipment (RPE) is required.

1. The Employer must ensure that Students nominated to attend this Course are physically, mentally and technically capable of meeting the requirements of the Course.
2. Students should be certified in the wearing of Respiratory Protective Equipment on the Company site to be used for confined space entry / access at least to the following levels:
 - has passed a Claustrophobic test for RPE in confined spaces,
 - has demonstrated the correct donning, operational use and doffing of the RPE to be used,
 - understands the safety features and wearer limits and warning devices provided within the equipment and
 - has been certified as having these competencies within the previous 12 months.
3. Face fit:

It is the responsibility of the Training Provider and of each Trainee to ensure the effectiveness of the facemask seal on the face by testing on every occasion prior to any Training exercise to ensure that the best possible face seal is achieved. Face fit tests are not required when using a powered respirator or a loose fitting face piece.
